## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted. It is further noted, that each group named below is subject to further restriction.

Group 1, claim(s) 1-8, 17-18, 36, 37, and 41, in part, drawn to an OCT1 polynucleotide, vector and host cell.

Group 2, claim(s) 9-10, drawn to a method of making polypeptides.

Group 3, claim(s) 11, 36, 37, and 41, in part, drawn to an OCT1 polypeptide.

Group 4, claim(s) 12-14, 36, 37, and 41, in part, drawn to an OCT1 antibody.

Group 5, claim(s) 15-16, 36, 37, and 41, drawn to a transgenic animal.

Group 6, claim(s) 19, drawn to a method of identifying a SNP.

Group 7, claim(s) 20-28, drawn to a method of identifying a prodrug or drug or inhibitor capable of modulating the activity of an OCT1 polypeptide.

Group 8, claim(s) 29-35, drawn to diagnostic methods.

2. Each group named above is subject to further restriction. Applicant is required to elect a specific SEQ ID NO as well as a polymorphic position within the SEQ ID NO. Additionally, for group 7, applicant is required to elect the polypeptide of claim 11 or the solid support of claim 17/a cell expressing a polynucleotide of claim 1/gene of claim 4, vector of claim 6.

3. The inventions listed as Groups 1-8 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Claim 1, for example, is directed to an oligonucleotide that hybridizes to the OCT1 gene. Such reads on a 10mer polynucleotide array,

for example, as taught by Brennan (US Patent 5,474,796). Accordingly, the claims lack a special technical feature over the prior art and lack unity of invention.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Jehanne Sitton whose telephone number is (571) 272-0752. The examiner can normally be reached Monday-Thursday from 8:00 AM to 5:00 PM and on alternate Fridays.
